## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson et al (1,676,975). Anderson discloses a golf ball box comprising a box body and a cover or lid fitted over the box (item 15, fig. 1). The box further includes indicia printed on the box explaining the novelty of the box or advertising. Applicant also claims indicia on a box. However, the indicia are not considered patentable because it is not functionally related to the substrate (box). See In re Miller 164 USPQ 46. Where the only difference between a prior art product and a claimed product is printed matter that is not functionally related to the product, the content of the printed matter will not distinguish the claimed product from the prior art, see MPEP 2112.01 III. One of ordinary skill in the art would vary the indicia on the box to convey the desired message to the user.

### ***Response to Arguments***

Applicant's arguments with respect to claims 12-43 have been considered but are moot in view of the new ground(s) of rejection.
